张 鹏

69958288 zhangpeng20252025@163.com FinTech/Data Analysis/DigiMarket

Core Competencies

10+ years of hands-on experience in FinTech, real estate digitalization, and AI product operations, with strong business strategy and AI implementation capabilities. Proficient in end-to-end delivery: business requirements → AI modeling → product commercialization. Led the development of multiple FinTech platforms and digital marketing systems, serving 50+ leading enterprises, with 30+ patents & software copyrights and transaction volume exceeding 10B value. Currently pursuing a Master' s degree in AI and Business Analytics, with solid expertise in AI modeling and big data architecture to support enterprise AI digital transformation.

Educational Background

Master' s Degree Lingnan University 2025/09 to Present (Graduating in June-Apply for IANG)

AIBA(Master of Science in Artificial Intelligence and Business Analytics) Grade: **3.67** / 4.0

- Core Courses: AI Fundamentals, Database Management, Machine Learning & Deep Learning, Blockchain, Computer Vision, Data Visualization etc.
- Specialized in AI model commercialization and big data analysis; AI research, Greater Bay Area AI competitions, and government AI-Agent projects; 2 papers pending publication, 1 patent pending

Master' s Degree The George Washington University(US). Electrical Engineering 2010/01-2012/02

- Grade Scholarship, Paper published

Bachelor's Degree North China Electric Power University (Beijing 211, 985 Platform Universities)

Materials Science and Engineering 2005/09-2009/06

- Outstanding Student at University, University Scholarship, University Student Union Leadership

Qualifications and Skills

- Core Technology Stack and Big Data Analytics: **Python**(Pandas/Numpy/Matplotlib/Scikit-learn), **PyTorch**(Deep Learning/Model Development), **Solidity**(Blockchain Smart Contract Development), **SQL**(MySQL/PostgreSQL, Querying/Modeling); BigData Architecture: Hadoop(Distributed Storage), Spark(Distributed Computing - Stream Processing), End-to-End Big Data Analytics Design Capability
- AI Professional Knowledge and Skills: Undertaking **OpenClaw+OpenManus** Enterprise-Level Practical Applications. Transformer architecture, long-text processing, multimodal interaction technologies, **Diffusion Models**(image/video generation), **RAG**(knowledge enhancement retrieval), capable of adapting and fine-tuning business scenarios based on e.g. Hugging Face for business adaptation and fine-tuning. Apply large model capabilities to intelligent Q&A, multimodal content generation, knowledge graph-assisted decision-making, and other commercial analysis/product scenarios, providing business AI driven solutions
- Data analysis and visualization: SPSS(statistical analysis), FineReport(enterprise-level BI display), Power BI, Tableau(interactive data visualization and dashboard design); able to independently complete the entire process from data cleaning to business insight delivery
- Product development and collaboration: Jupyter Notebook, Google Colab, VS Code, HTML5/JavaScript(front-end prototyping)

- Product design and prototyping: Axure RP, MockingBot, BoardMix, Sketch, capable of producing research, PRD/MRD, high-fidelity prototypes
- Project management and collaboration: Agile development: Jira, Asana; Task tracking: Linear, ClickUp; Documentation collaboration: Notion, Confluence
- Project management Certifications: PMI-PMP(Project Management) Information Systems Management Certification, Proficient In Full Project Lifecycle Management (Initiation-Implementation-Acceptance-Operation-Iteration), Skilled in Agile Development and Cross-Departmental Requirement Communication
- Security Management Qualifications: Network Communication Security Management, Database Security Certification, Assisted Company in Application for High-Tech/Little Giant/Torch Plan, etc.
- Financial Technology: Fund Practitioner Qualification, Asset Appraiser, Guangzhou FinTech Talent Pool, CFA Level I, Financial Scenario Data Analysis and Product Design Capabilities
- Operations and Comprehensive Competencies: Internet Marketing Certification, Tencent Certified Marketer, New Media Advertising Campaign Manager, ByteDance Tidbit New Media Live Streaming Trainer, Capable of Full-Chain operations from content planning to operation conversion
- Professional Training: Hopefluent Group Internal Training Instructor, Digital Training Specialist(Project Management/Big Data Specialization), FinTech Trainer
- Languages and Others: Fluent in English, Basic Cantonese, Remote Specialized Maintenance for B737NG Aircraft Systems Study(Cross-Disciplinary Learning and Complex Problem-Solving Abilities)

Career Experience

Shenzhen Shuyuan Wansuan Info Technology. AI Product Operations Director 2024/11 -

- Led AI project delivery and commercialization; Managed AI big data systems, BI dashboards, sales large models, and enterprise data governance (GraphRAG); Implemented solutions for Xinbao, BAIC, China Tobacco, Wuling Motors
- Led multimodal large-model system design, prompt engineering, algorithm integration, and model tuning; Helped the company obtain 9 AI patents; Built vertical models in real estate, e-commerce, automotive, appliances, and consulting
- Developed AI ecosystem partnerships with ByteDance VolcEngine, Huawei Ascend, and Super Fusion; Delivered 30+ Agent solutions for government and enterprise clients
- Completed official registration of real estate marketing and sales large models with Shenzhen Municipal Bureau of Industry and Information Technology; Among the first batch of compliant AI model filing enterprises in Shenzhen

Hopefluent Group Holdings Limited (0733.HK)

· > AI & Internet Platform Operations Director 2016/08-2024/10

- Participated in AI+ digital transformation; Built full-link digital marketing systems and new media matrix (web, App, mini-program, Douyin); Covered 83 regional platforms served 5.5 million families
- Promoted AI Hopefluent intelligent projects including real estate valuation and credit investigation; Obtained multiple patents and won "Best Digital Transformation Project Award"
- Built private domain traffic system and new media matrix; Integrated MCN/KOL resources; Launched "Content + Consulting" real estate consultant model

- Integrated digital technology with core real estate and financial businesses; Built AI Hopefluent Platform and Banglin App for data-driven decision-making

·> Internet Financial Business Department – Manager

- Managed end-to-end FinTech operations including HFmoney, HFcredit, real estate valuation, and private fund systems; Supported mortgage and supply chain finance
- Oversaw financial data management and credit analysis system; Partnered with banks and trusts; Served 100,000+ SMEs with transaction volume over 10 billion RMB; Obtained 12 software copyrights
- Participated in compliance and industry rectification; Assisted in High-Tech Enterprise certification; Appointed as Chairman Unit of Inclusive Finance Association; Member of Guangzhou FinTech Talent Pool and IT Audit Working Group

SHENZHEN THIRD-PARTY INTERNET SERVICE CO., LTD. OPERATIONS DIRECTOR 2015/07-2016/08

- Responsible for IT product operation management and online compliant operation, spearheaded the construction of the company's F2B system platform and O2O promotion, provided investment and financing services for more than 200 small and medium-sized enterprises (SMEs). The platform's key operation indicators, including new user retention rate (Retention) and DAU/MAU, ranked among the top in the industry
- Built an online CRM (Customer Relationship Management) system, carried out member management and user behavior analysis, optimized product and service quality, and enhanced user experience.
- Formulated team performance goals and operation plans, promoted cross-departmental collaboration, realized the commercial closed-loop value of the platform, and enhanced the industry competitiveness

GD DELI DEVELOPMENT GROUP NETWORK DEPARTMENT PRODUCT MANAGER 2013/07-2015/07

- Developed full lifecycle IT product plans; Launched 01vip e-commerce, Caiguanjia supply chain App, Ziyou Yizu (11185.cn), and pledge management system.
- Coordinated demand research, R&D, and launch across tech, marketing, and operations teams.

UNITED NATIONS ASSOCIATION (UNITED STATES). IT ENGINEE 2011/12-2013/06

- Developed and maintained the United Nations Charity Fund website in Washington D.C., serving 230,000 philanthropists
- Optimized client management interface, database, and data analysis; Ensured stable system operation and bug fixing; Liaised with financial and data institutions for data exchange and interface integration

AI Practical Projects

<u>Financial Credit Evaluation and Prediction Model</u>:

- **Scenario**: Credit risk control for micro, small and medium-sized enterprises (MSMEs), addressing the issues of low efficiency and strong subjectivity in traditional evaluation methods;
- **Technology**: Leveraged PyTorch + decision tree/regression algorithms, and Hadoop for distributed processing of over 50,000 pieces of operational/financial/credit reference data;
- **Outcomes**: Achieved industry-viable accuracy rate, output automated credit ratings, and supported

university research and industry pilot projects.

Intelligent Real Estate Evaluation and Personalized Recommendation System:

- **Scenario**: Real estate digitalization, enabling dynamic evaluation of property value and precise matching of housing listings;
- **Technology**: Adopted Python + Spark big data architecture, multi-factor valuation model + recommendation algorithm, processing over 240,000 pieces of behavioral/housing listing data;
- **Outcomes**: Improved evaluation efficiency by 80%, increased recommendation accuracy by 60% and user conversion rate by 35%; the solution has been connected to real estate agencies for trial use.

Blockchain-based Financial Data Analysis Platform:

- **Scenario**: Financial data security, addressing risks of data leakage and tampering, and onboarding Real World Asset (RWA) such as income warrants onto the blockchain;
- **Technology**: Utilized distributed architecture + Solidity smart contracts to implement full-process on-chain data deposit and certification, asset authentication, and income right distribution;
- **Outcomes**: Achieved blockchain security and compliance requirements, participated in the Hong Kong Blockchain Competition, and the solution can be integrated with asset-side systems with scalable promotion value.

SRR Intelligent Case Handling System (Housing Department AI):

- **Scenario**: Slope maintenance application system for the Architectural Services Department (Hong Kong), resolving pain points of slow government case processing and a high mismatch rate of 42%;
- **Technology**: Adopted a 7-layer Agent architecture integrating OCR, multimodal learning, RAG, GraphRAG and Transformer, with PostgreSQL vector database;
- **Outcomes**: Reduced processing time from 55 minutes to 10 minutes (efficiency improved by 75%), achieved information extraction accuracy of over 95%, and formed a replicable AI solution for government affairs.

Project Achievements & IP Publications

Key Project Results

- **AI Ecosystem & Qualifications** (2024–2025): Partnered with Huawei, Super Fusion, and ByteDance VolcEngine; 4 AI model & algorithm filings approved by Shenzhen Bureau of Industry and Information Technology
- **Enterprise-level AI Platform** (2021–2022): Led AI Hopefluent Platform; Integrated real estate agency, marketing, finance, and property management
- **FinTech & Regulation** (2016–2019): Conducted on-site supervision audits for online lending; Built real estate monitoring and HFcredit systems (all with software copyrights); Risk control system won industry awards
- **Product & Business Launch** (2018): Yizhongtong App covered 16 cities and 27 channels; Won company awards

Patents, Copyrights & Papers

- **AI Achievements** (2025–2026): 1 patent pending (AI big data & large models); 2 papers pending (Transformer/Diffusion, AI real estate inspection)
- **Total IP**: 12+ patents & software copyrights in FinTech, real estate digital marketing, AI big data
- **Academic Achievement**: CISS 2012 (Princeton University) — *Datacenter Net Profit Optimization with*

Deadline Dependent Pricing.

Self-Appraisal

- 10+ years of digital and AI full-chain experience; Deeply engaged in AI implementation since 2021; Expert in large-model mechanism and human-AI collaboration; A rare cross-functional expert in product, operations, AI technology, and business analysis.
- Proficient in data-driven decision-making, AI project delivery, and full-cycle product management; Reliable, results-oriented, and excellent at cross-department collaboration; Experienced in Chinese and Western markets with extensive business resources.
- Currently pursuing a Master’s degree in AI; Fluent in English and Cantonese; Focused on AI business analytics, data products, and digital operations in Hong Kong; Specialized in transforming large models, RAG, multimodal, and big data into practical ToB/ToG solutions with measurable business value.

-Thank You For Your Time-
